Summary

Motivated Software Developer fresher with a strong in programming and web development. Skilled in HTML, CSS, JavaScript, and problem-solving through practical projects. Eager to learn new technologies and contribute to innovative software solutions.

Skills

Technical: Python, Java, JavaScript.

Web Technologies: HTML, CSS, React, Mongo db, MySQL.

Frameworks: Tailwind css, Bootstrap.

Tools: Power BI, Excel, Figma.

Core: Machine Learning Algorithms (Regression, Classification, Clustering)

Projects

- **Food Ordering Web Application** - React.js, JavaScript, HTML, CSS, Node.js.

Developed a responsive food ordering web application with features like food browsing, search, and order management. Built reusable React components and integrated frontend services.

- **Cryptocurrency Tracking Application** - React.js, JavaScript, REST API, CSS.

Developed a crypto tracking application to display real-time cryptocurrency prices, market trends, and coin details. Integrated API data fetching and implemented search and dynamic UI features.

Education

B.Tech – Artificial Intelligence and Data Science Engineering

2026

J.N.N Institute of Engineering

CGPA: 8.87

Internships

- **Web Development**

Role: Design and Implementation.

Technologies: HTML, CSS, JavaScript, python, sql.

Organization: Edify Technologies, Vadapalani.

- **Data Analytics using Power BI**

Role: Developer

Tools: Power BI, Data Visualization

Organization: Spark Technologies, OMR Thoraipakkam

Publications

- "A Text Analytics Approach to Structured Data from Machine Learning" (2024)

Published in **International Journal of All Research Education Scientific Methods (IJARESM)**

ISSN: 2455-6211

Certifications

- Internet of Things (NPTEL 2024)

12 weeks course

- PerpInsta (Java Course)

420 hours
